

## E - Z Roller Felting Machine

E-Z roller felting machine. Model 3614 made in USA. 123cm wide, 48cm high, 30cm deep.

Developed with the felting hobbyist in mind while focusing on dependability, safety and affordability. This machine is an energy and time saver while maintaining ease of use. Use it to create everything from wall hangings, to light-as-a-cloud scarves and nuno-felted items. The machine is very easy to use. Use it for any felting application where you would normally be rolling your bundled project with your arms. Instead, your felting project is rotated between motorized rollers, which do the monotonous work for you.

Full instructions with it and can deliver. £400 or near offer.
