

For Sale -

Ashford Traveller - a classic upright "castle" style spinning wheel. It features a compact footprint, a single treadle, and a sliding-hook flyer.

Key Features and Specifications

Design & Weight: Weighs approximately 5.8 kg (12.7 lbs) with a compact castle design, making it a favourite for travel and smaller spaces.

Drive System: The Traveller is a single-drive wheel using Scotch tension for smooth, accurate brake adjustment.

Momentum: Features an 18-inch (46 cm) heavier drive wheel that gives 20% more momentum, requiring less effort to treadle.

Accessories: Comes with four large-capacity 90mm sliding-hook bobbins and a built-in Lazy Kate.

This spinning wheel is fully functioning and is very quiet when in operation. I'm not sure of its age but my mother had been using it for craft fair demonstrations and enjoyed it for over 20 years before she passed away.

I would like to sell it for offers over £250. I have seen the same model on eBay and priced it appropriately. I'm happy to bring it along to anyone who is interested and would like to see it.
